

PROGRAM

Tuesday March 12, 2019

Time	Event	Location
19:00-21:00	Get-together Dinner	Schiffergesellschaft Restaurant

Wednesday March 13, 2019

Time	Event/Title of Talk	Location/Speaker
09:45-10:15	Registration and refreshments	CBBM Foyer
10:15-10:35	Prenatal programming of the circadian stress axis in mice	Mariana Astiz, Lübeck
10:35-10:55	Acetyltransferase Tip60/KAT5 as a capacitor of Drosophila circadian clock	Vinodh Ilangova, Göttingen
10:55-11:15	BodyTime: Highly accurate determination of internal circadian time from a single blood sample	Bharath Ananthasubramaniam, Berlin
11:15-11:35	A neuronal model for phasing day sleep in Drosophila melanogaster	Angelique Lamaze, Münster
11:35-11:55	The conflict of teenage owls and early school starts	Carmen Molenda, Munich
11:55-12:55	Lunch and Poster Session	CBBM, 1st Floor
12:55-13:15	The rhythmic microbiome in humans	Silke Kiessling, Munich
13:15-13:35	Searching for neural correlates that control sleep wake-cycles in loose-patch clamp recordings of the circadian clock of the Madeira cockroach in vivo	Jenny Plath, Kassel
13:35-13:55	Mathematical modelling elucidates a degradation switch in Neurospora circadian clock	Abhishek Upadhyay, Berlin
13:55-14:15	A kinase-based body temperature sensor controls alternative splicing: from circadian biology in mammals to sex determination in reptiles	Florian Heyd, Berlin
14:15-14:45	Coffee Break	CBBM, 1st Floor
14:45-15:30	Keynote Lecture: Shining light on glucose metabolism	Andries Kalsbeek, Amsterdam
15:30-16:00	Planning of next meeting	CBBM Foyer
